

LED Modular Area Light

Premium Series

The ASD Modular Area Light is designed to adapt to your needs. Our innovative modular technology and multiple mounting configurations make this fixture ideal for any outdoor application. The LMAL puts you in control of your lighting project. Although the fixture combinations are limitless, some common applications include parking lots, sports complexes, wharfs, stadiums, ports, agriculture, mines, outdoor music venues, parks, train stations, truck stops and so on!

FEATURES AND BENEFITS:

- ▶ Lighting Modules are individually adjustable, removable to rotate ($\pm 30^\circ$)
- ▶ Lighting Modules beam spread is 120° standard or $60^\circ/30^\circ$ by changing lens
- ▶ 500 – 1,000W available, 135 lumens per watt
- ▶ UL/DLC listed PREMIUM
- ▶ IP 66 all weather condition
- ▶ L70 lifetime > 150,000 hours
- ▶ 5 year warranty

INSTALLATION GUIDE

IMPORTANT SAFETY INFORMATION:

Please read all the instructions below before installation.

- ▶ Make sure that the supply voltage corresponds to the rated product voltage.
- ▶ The product must be installed by a qualified electrician in accordance with the National Electrical Code and corresponding local codes.
- ▶ If the product is damaged, do not use it.

⚠ WARNING

RISK OF PERSONAL INJURY – READ and follow all WARNINGS and installation instructions.

Keep or give to the owner for future reference.

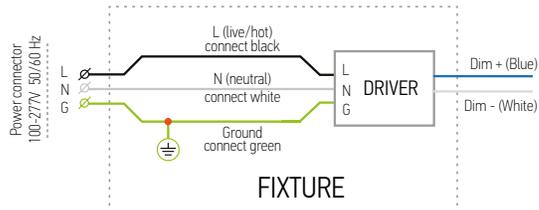

Risk of cuts: Wear gloves to prevent cuts or abrasions when removing from carton, handling, installing, and maintaining this product.

Risk of electric shock: This product must be installed in accordance with the applicable installation code by a person familiar with the construction and operation of the product and the hazards involved.

Risk of Fire: Minimum 194°F supply conductors. Consult a qualified electrician to ensure correct branch circuit conductor.

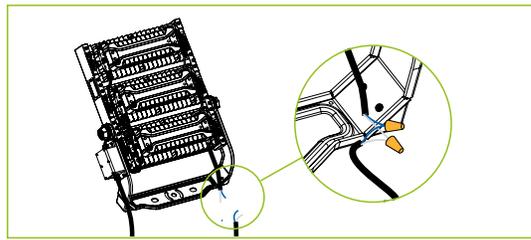

ASD® assumes no responsibility for claims arising out of improper or careless installation or handling of this product.

ELECTRICAL SCHEMATIC DIAGRAM

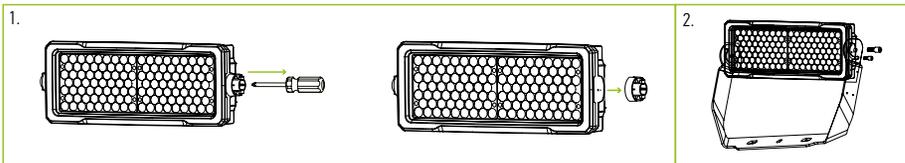

DIMMING WIRES

1. Remove the 4 Philips head screws in the blue end covers on either side of the driver housing.
2. Using a hex key remove the 2 bolts holding the driver housing to the body of the fixture (hex key is customer supplied). Take the dimming wires out.
3. Complete low voltage wiring following electrical diagram on page 3.
4. Reattach the driver with the 2 hex bolts and secure blue end covers with Philips head screws.

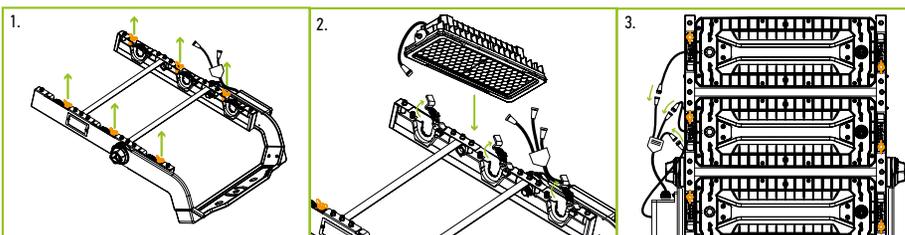

INSTALLATION 250 W MODULE

1. Remove the circular brackets from either side of the unit.
2. Attach the U-mount lock into place at desired angle.

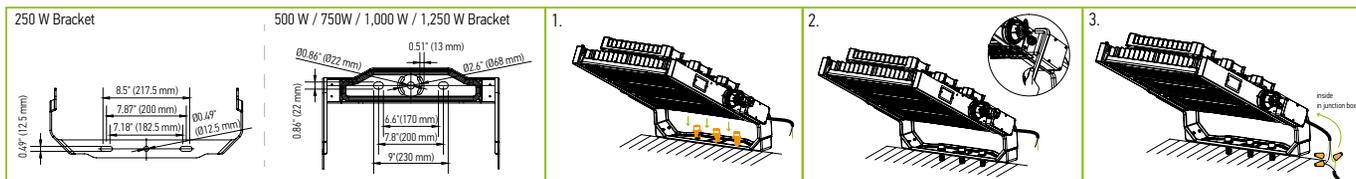

FIXTURE ASSEMBLY

1. Remove wing-nut and spring assembly from each side of the bracket.
2. Install module(s). Secure at desired angle with wing-nut and spring.
3. Plug female leads from module(s) into male lead from the bracket junction box.

INSTALLATION WITH THE DEFAULT MOUNTING BRACKET

1. Drill holes on the mounting surface corresponding to the holes on the bracket; Fix the fixture with screws (2 M12 screws for 250W fixture, 3 M20 screws for higher wattages, (customer supplied).
2. To adjust mounting angle, remove rubber caps from adjustable knuckles on each side of the bracket, adjust knuckles to desired angle with a 14mm hex key (customer supplied). Tighten hex bolts and reinsert rubber caps.
3. Complete wiring following electrical diagram (can be found at the beginning of installation guide).

OPTIONAL ACCESSORIES

KNUCKLE MOUNT SLIP FITTER KIT (SOLD SEPERATELY) ASD-LMAL-SFK

Compatible with 500-750W models only

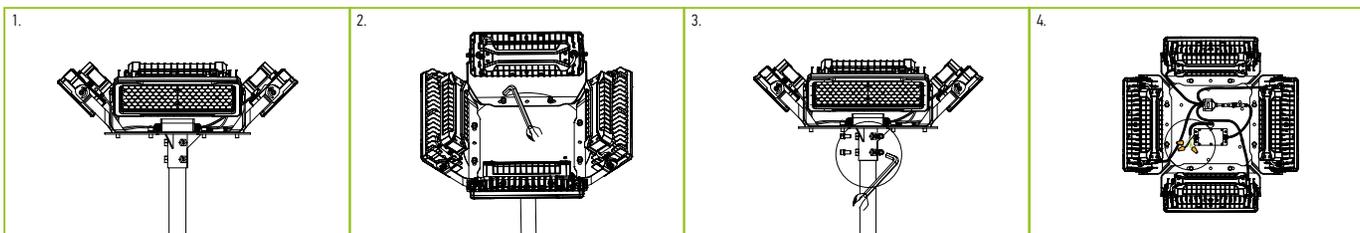

1. Remove rubber caps from adjustable knuckles on each side of the bracket, remove hex bolts securing outer bracket to inner bracket assembly.
2. Replace stock outer bracket with slip fitter/trunnion kit. Adjust knuckles to desired angle, tighten. Pass wires from j-box through hole in trunnion bracket and through slip fitter. Attach slip fitter to trunnion with 4 bolts (included).
3. Complete wiring following electrical diagram (can be found at the beginning of installation guide).
4. Mount fixture on pole, adjust module/-s to desired angle and secure it with wing-nut and spring.

MULTIPLE FIXTURES POLE MOUNTING KIT (SOLD SEPARATELY) ASD-LMAL-LTM

Compatible with 1-4 250W fixtures only

1. Attach up to (4) 250W fixtures to the mounting kit with M12 screws (included).
2. Tighten each bracket to mounting plate
3. Tighten plate slip fitter to pole with 6 screws M12 (customer supplied).
4. Complete wiring following electrical diagram (can be found at the beginning of installation guide).

LASER INSTALLATION

1. Insert the laser into the round laser holder with 3 screws, locate the holder in the middle of the laser handle and tighten the screws.
2. Insert the L-shape flat mounting bracket into the corresponding hole at the bottom of the round holder till it fits securely.
3. Screw the second end of the L-shape flat mounting bracket to the top of the first module.

LENS INSTALLATION

1. Get to the back of the module and remove 12 screws holding front frame.
2. Remove the module front frame, tempered glass, waterproof rubber ring and 2 original lenses.
3. Attach 2 new lenses, screw them with 6 screws, put back the waterproof rubber ring, tempered glass and the module front frame, make sure they are aligned.
4. Tighten 12 screws on the back of the module to complete the install.

VISOR INSTALLATION

1. Get to the back of the module and remove 12 screws holding front frame.
2. Replace the module front frame with the one coming as part of visor kit (has 6 screw holes in it).
3. Screw the new front frame to the module with 12 screws.
4. Attach the visor to the front of the module with 6 screws (included).
