

- DESIGN LED UFO HIGH BAY Q-BASE has a built-in motion sensor base, allowing you to install the microwave motion or PIR sensor. Die-cast aluminum housing with excellent heat dissipation along with an anti-glare PC lens provide many years of use. It can operate in temperatures ranging from -40 to 140°F. It runs on 120-277V or 277-480V circuits with a 0-10V dimmable driver.
- COLOR AND POWER SELECTABLE You can choose either a 3,000K warm white, 4,000K cool white or 5,000K daylight color temperature, and change the power with a simple switch.
- IP69K rating provides protection against ingress of dust and high temperature, high pressure water.
- SURGE PROTECTION 6kV protects the fixture from voltage spikes and current surges.
- **INSTALLATION** This fixture has three different mounting options: suspended, surface, and pendant. It comes with 4 ft cord. Perfect commercial or industrial solution for warehouses, supermarkets, retail stores, gyms, and many other applications.
- ADVANTAGES With calculated lifespan up to 155,000 hours, these fixtures are made to last decades under normal operation! ASD provides a 5-year limited warranty along with UL and DLC Premium certifications to guarantee top quality products and safety!

Brand	Lutron		Leviton		
Models	DVSTV	DVTV	DS710		
Regular and voluntary certific	ations				
5-year limited warranty					
DesignLights Consortium (DLC General application: High-bay;) listed (classification: Pre Primary use: High-bay lu	mium) Main: Indoor lumi minaires for commercial	inaires; and industrial buildings.		
III listed E473804					

PACKAGE CONTENTS:

Description	Q-ty
LED UFO High Bay with Q-Base	1
Mounting ring (A)	1
Box	1

^{*} Under extreme conditions fixture may enter protection mode. If ambient temperature exceeds 140°F (60°C) for an extended period of time, lumen output will decrease to 60% capacity. At higher sustained temperatures protection mode will terminate power to the fixture.

ACCESSORIES (sold separately):

Note: Battery back-up kit and the Motion sensor kit can not work together. Please install one at a time.

MOTION SENSOR INFORMATION

REMOTE CONTROL HD05R sold separately:

Button		Remarks	Button		Remarks Button Remarks		Remarks	
(1)	ON/OFF	Turn the sensor ON/OFF.	Apply	Apply	Applies current scene settings to the fixture.	(1)	Hold time	The period that light will stay illuminated 100 % after no motion is detected. Use this button and the + - buttons to adjust.
MW/PIR	MW/PIR	Select microwave or infrared sensor.	y_{\star}	Detection range	Also known as "sensitivity", 100 % means the highest sensitivity and longest distance. Use this button and the + - buttons to adjust.	known as 'sensitivity', 100 % means the highest sensitivity longest distance. Use this button and the + - buttons to adjust. Stand-by period		The period after holdtime, during which the light keeps standby dimming level. Use this button and the + - buttons to adjust.
Scene	Scene	Shows current settings saved in remote.	:Ŏ:	Stand-by dimming	After hold time, the light will dim from 100 % to optional standby dimming levels. Use this button and the + - buttons to adjust.		Daylight sensor	The preset lux level at which motion will be detected. Use this button and the + - buttons to adjust.
Start	Start	Press this to begin scene setup.		Up	The main functional buttons to adjust the factors to desired level.		Test mode	Press this button to test the sensor; it will temporarily change the hold time to 2s. This setting cannot be saved.
Memory	Memory	Saves the scene settings.	8	Down	Press + - button to dim light directly in non-detection mode.	POWER %	Power	The dimming output in detection mode. Use this button and the + - buttons to adjust.

^{*} When any programming is set, icon will blink for 5s and fixture will dim and then resume at 100 % meaning the program has been saved.

Infrared motion sensor 3pin

Installation precautions:

- Microwave sensor can be installed in any lamp except one with a full metal shell
 The detected surface cannot be shielded by metal objects.
- 3. Make sure the microwave module is completely exposed.
- 4. The detection surface of the sensor module should be installed facing the detection area.

Application environment:

- 1. Suitable for indoor installation to avoid false triggering due to external factors such as rain, wind or
- The inventant.

 2. Shall not be installed in a place with all metal walls or small spaces (such as galvanized-iron roof).

 3. Shall be mounted securely, to avoid any false triggers caused by movement of the fixture itself.
- 4. Shall not be installed next to large operating machines such as a ventilator or ceiling fan, to avoid false triggers caused by machine vibration.

User notes:

- 1. Microwaves can penetrate walls or glass thinner than 0.8° but will be impaired if thicker than 0.8°.
 2. The driver voltage shall be stable and float within 10 %.
 3. Detection area will be affected by speed of motion, mounting height and movement volume.

- 4. Conduct testing with adequate ambient lighting for best results

HD09VR-MH:

- Highest mounting height is 49.2ft (15m)
 This figure indicates the
- maximum distance at the highest mounting height with 100 % sensitivity.
 - Well detected area Possibly detected area

HD09VR-PH:

Mounting Height < 39.4 ft (12 m) ceiling mounting

Detection distance radius 9.8-22.9 ft (3-7 m)

Specifications	Model: HD09VR-PH	Model: HD09VR-MH
Operating voltage	10-15 V	
Operating current	< 15 mA	< 30 mA
Working mode	0-10 V	
Detection area	25 %/50 %/75 %/100 %	
Hold time	Remote control: 5 s/30 s/1 min/3 min/5	nin/10 min/20 min/30 min Built-in switch: 5 s/1 min/5 min/10 min
Daylight threshold	2 lux (0.2 fc)/10 lux (0.9 fc)/30 lux (2.8 fc)/ 300 lux (27.9 fc)/350 lux (32.5 fc)/400 lux (50 lux (4.7 fc)/80 lux (7.4 fc)/120 lux (11.2 fc)/200 lux (18.6 fc)/250 lux (23.2 fc)/ 37.2 fc)/disable
Standby period	0 s/10 s/30 s/1 min/5 min/10 min/30 m	n/60 min/+ ∞
Standby dimming level	Remote control: 10 %/20 %/30 %/50 %	Built-in switch: 0 %/10 %/30 %/50 %
Operating temperature	- 4°F to 140°F (-20°C to 60°C)	- 40°F to 158°F (-40°C to 70°C)
Mounting height	≤ 39 ft (12 m)	max 49.2 ft (15 m)
Detection range	≥ 9 ft (3 m)	
Operating frequency	-	5.8 GHz ± 75 GHz
Transmitting power	-	< 0.3 mW
ID rating	ID/E	·

DEFAULT SETTING:

Specifications	
Detection area	100 %
Hold time	20 min
Daylight threshold	Disable
Stand-by period	0 s
Stand-by dimming level	10 %

RF interference may affect the operation of this sensor.

WITH DUSK/DAWN FUNCTION:

- 1. With insufficient ambient brightness, sensor turns on light and keeps it at standby dimming level even if there is no motion or presence.
- 2. When sensor detects motion or presence it will bring the light level up to 100 %.
- 3. After motion is no longer detected, fixture remains at 100 % for hold time.
- 4. After pre-set hold time period it will dim to standby dimming level again and always keep it.
- 5. With sufficient ambient brightness, sensor will turn OFF light automatically.

WITH DAYLIGHT DISABLED:

- 1. Sensor turns ON light when motion is detected.
- 2. Light will stay on after detecting motion for the desired hold time.
- 3. Sensor dims light to standby dimming level after hold time if there is still no motion.
- 4. Sensor turns OFF light after standby period.

WITH DAYLIGHT THRESHOLD:

- 1. With sufficient daylight, the light remains OFF even after motion is detected.
- 2. With insufficient daylight, the sensor turns light ON when motion is detected.
- 3. After there's no motion detected, the sensor keeps light ON 100 % for holdtime.
- 4. After holdtime, sensor dims light to standby dimming level for standby period. If the standby period has been set as 0 s, sensor turns light OFF automatically after holdtime.
- 5. The sensor turns OFF light automatically after the standby period when there's no motion detected.

DAYLIGHT HARVESTING:

- 1. When ambient brightness is lower than preset lux level, sensor will turn on light automatically and keep dimming according to the change of the ambient brightness. As it gets darker outside the fixtures will brighten, and as it gets brighter outside the fixtures will dim down.
- ${\bf 2.}$ When the ambient brightness exceeds the preset lux level, the light will turn OFF.

To avoid blocking the microwave emission, the microwave sensor can not be covered with metal materials, be sprayed with a coating of metal components, or have attached metal material or stickers etc.

The distance between the antenna and the glass (dielectric material) should be no less than 0.4ft when the sensor is within the glass lampshade. Otherwise, the microwave motion sensor will not penetrate the glass easily.

Avoid placing the sensor inside a metal chamber, this may cause a mis-trigger.

sensor

metal chambe

The sensor should not be placed in a small confined space. To avoid increasing the sensor detection range or abnormal operation, the sensor should be kept away from large areas of metal and glass reflectors (separation distance at least 3.3ft). Reduce the detection area setting.

metal

sensor

<u></u>

(X)

To avoid affecting the microwave signal transmission, the microwave antenna should be higher than the surrounding metal surface.

sensor

Any vibration or movement may trigger the sensor. Ensure the sensor is far from any constant movement.

| sensor |

 $(\underline{\mathbb{S}})$

vibration

When multiple sensors are installed side-by-side in the same direction, the distance between each sensor should be at least 3.3ft (the warehouse sensors at least 9.8ft) to avoid mutual interference.

DAYLIGHT HARVESTING SETTING:

- 1. Adjust "daylight" value higher than 50lux.
- 2. Preset "standby period" 0S
- 3. Press MW/PIR button 3 times until the MW/PIR icons are both blinking on LCD screen, daylight harvesting function enabled. (With BLE version, press DH button, daylight harvesting function enabled)

BATTERY BACK-UP KIT INFORMATION

BLD-RM40R BLD-RM60R

sold separately:

BLD-RM40R, BLD-RM60R listed for field and factory installation, provides constant power output to the load during emergency mode operation. They maintain illumination in emergency mode for a minimum of 90 minutes. It is an ideal emergency solution for UFO LED highbay lights.

BLD-GM60R-HV

sold separately:

BLD-GM60R-HV listed for field and factory installation, provides constant power output to the load during emergency mode operation. It maintains illumination in emergency mode for a minimum of 90 minutes. It is an ideal emergency solution for UFO LED highbay lights.

REMOTE TEST SWITCH

sold separately:

- Press the ON button to switch battery to the back-up mode. The indicator light will turn off and fixture will decrease light output.
- Press OFF to switch the fixture to normal operation mode.

STANDARD OPERATION DISPLAY STATUS:

AC operation: AC power is present. The AC driver operates the LED load as designed. The emergency driver is charging in standby mode.

The charging indicator will be lit, showing that the battery is charging

Emergency operation: When the AC power goes out, the emergency driver detects the AC power outage and automatically switches to emergency mode. When red LED light is OFF, that means driver is discharging. When the AC power is restored, the emergency driver goes back to AC power and starts recharging.

INSTALLATION GUIDE

IMPORTANT SAFETY INFORMATION:

Please read all the instructions below before installation.

- Make sure that the supply voltage corresponds to the rated product voltage. The product must be installed by a qualified electrician in accordance with the National Electrical Code and corresponding local codes.
- If the product is damaged, do not use it.

ELECTRICAL SCHEMATIC DIAGRAM:

Note: The dimmer can also be replaced by an active 1-10 V voltage source signal or passive components like resistors and zener diodes.

Do NOT connect Dim - to be output V - or V +, the driver will not

function properly.

 If 1-10 V dimming is not used, Dim+ should be open.
 When 1-10 V negative logic dimming mode and Dim + is open, the driver will output minimum current.

UHB3 with motion sensor

INSTALLATION STEPS:

- 1. Screw on the mounting ring (included) and tighten it. Open rubber caps on the middle of the lens, take off caps inside and adjust color temperature or/and power by simple switch.
- 2. Clip the fixture on the hook in the ceiling using the mounting ring.
- 3. Connect the wires: Black to Black, White to White, Green to Green. Secure the connection with wire nuts

▲ WARNING

RISK OF PERSONAL INJURY - READ and follow all WARNINGS and installation instructions. Keep or give to the owner for future reference.

Risk of cuts: Wear gloves to prevent cuts or abrasions when removing from carton, handling, installing, and maintaining this product.

Risk of electric shock: This product must be installed in accordance with the applicable installation code by a person familiar with the construction and operation of the product and the hazards involved.

Risk of Fire: Minimum 194°F supply conductors. Consult a qualified electrician to ensure correct branch circuit conductor.

ASD® assumes no responsibility for claims arising out of improper or careless Installation or handling of this product.

UHB3 with battery back-up kit

UHB3HV with battery back-up kit

SURFACE MOUNT BRACKET INSTALLATION

ASD-SMB1-UHB3-WH ASD-SMB1-UHB3-BK

ASD-SMB2-UHB3-BK sold separately:

- 1. Use four M5x9/16" screws (included) to install bracket swivel on the top of the fixture's body
- 2. Use two M6x5/8" screws (included) to secure bracket on the swivels.
- 3. Adjust the light direction and secure it using two M5x9/16" screws with screwnuts (included)

PENDANT MOUNT BRACKET INSTALLATION

ASD-PMB-UHB sold separately:

- 1. Remove the original ring from the driver.
- 2. Install the bracket and secure it to the driver using a M10 or M12 screw (included with the bracket)
- 3. Screw the bracket with the fixture onto a pole and secure it with an M3 screw (included with the bracket)

PENDANT MOUNT BRACKET WITH J-BOX AND SPRING HOOK INSTALLATION

ASD-PMB|B-UHB sold separately:

- 1. Uninstall the mounting ring from the fixture. Unscrew 2 screws and open the side plate on the Pendant Junction box. Install M10 or M12 Mounting screw depending of the fixture's thread size.
- 2. Mounting hook installation: Loosen security screw and install the spring hook into the upper installation hole of the Pendant J-box and secure it with screw. Secure Pendant J-box to the fixture, and then secure to the ceiling. Close and secure side plate back into place.
- 3. Pendant installation: Uninstall adapter from pole mounting hole. Secure the Pendant J-box and fixture to the pole. Secure fixture to the Pendant J-box. Close and secure side plate back into place.

MOTION SENSOR INSTALLATION

HD09VR-MH HD09VR-PH

sold separately:

- 1. Unscrew the microwave sensor base
- 2. Insert and twist the sensor until it is tight on the base surface.

BATTERY BACK-UP KIT INSTALLATION

BLD-RM40R BLD-RM60R sold separately:

- 1. Install the G-hook to the top thread hole of the battery back-up and secure with the screw. Attach the battery back-up with G-hook to the ceiling hook.
- 2. Loosen the screw on the enclosed hook on the bottom of the emergency backup, attach the ring on the fixture to the hook and tighten screw back. Open the cover and remove the plastic covers and install the five waterproof connectors.
- 3. Pull all wires through the waterproof connectors into the chamber of emergency driver. Connect wires: Brown, Blue, Green with AC input wires of the fixture. Connect dimming wires Purple and Pink with LED driver input dimming wires. Connect Black, White and Red wires of the battery back-up with AC main Power cord. Secure connection with wire nuts and lock up the cover of junction

BATTERY BACK-UP KIT INSTALLATION

BLD-GM60R-HV sold separately:

- 1. Insert battery back-up into the bracket and secure it with three screws. Attach junction box to the side of the bracket with two screws. Screw in mounting ring to the top and mounting hook to the bottom of the bracket. Secure them by 45° angle.
- 2. Attach bracket with battery to the ceiling using mounting ring. Attach lighting fixture to the mounting hook on the bottom of the bracket and secure it with screw.
- 3. Plug the fixture's power cable and circuit cable into the junction box. Wire according to the wiring diagram inside the junction box. Close junction box with cover and secure it with two screws.
